Children's Health Month

www.HealthyBeing4U.com

Dear Parent,

By now, most of us have seen the warnings and news releases about the voluntary recall of non-prescription cough and cold medicines for children. In recent months, just prior to a review hearing by the FDA, drug companies decided to pull from the market 14 multi-symptom cold and cough medications for infants and toddlers. The FDA advisory panel concluded these medications were neither safe nor effective, and recommended banning these products for all children under the age of 6 because of the threat of overdose when used incorrectly. Next, some suggested that the ban be broadened to include all children up to 12 years of age. Not surprisingly, practitioners and parents all over the country are looking for alternatives.

If you are looking for a natural, effective and safe alternative for your child, I encourage you to consider the children's products offered in Ortho Molecular's Springboard line. Springboard products are formulated with the best science while utilizing the finest raw materials to help keep youngsters healthy and strong. Among these products is **Natranix**, a natural cough formula in a great tasting syrup. Also included is **Imu-Max**, a natural immune defense formula backed by a published clinical study!

To find out more about Springboard, please visit my website at:
